

4' x 100' 1/2" x 1/2" 19 GA HDG Galvanized Hardware Cloth

1/2"x1/2" 19-gauge galvanized hardware cloth welded wire roll:

EarthSavers welded wire roll has numerous properties that make it a good choice as a fence and can be used for horizontal applications such as gopher netting. The zinc layer on its surface gives it extra protection and offers excellent corrosion resistance and high strengths, even at thinner gauges. It is flexible and will not break when bent. It maintains its properties in hot and cold temperatures. Its low cost makes it the perfect choice over base metal like aluminum or stainless steel. Its durability makes it a good choice over less resistant plastic fencing options.

Advantages of galvanized welded wire products:

- **Cost effective** – Fraction of the cost of other type of fences
- **Easy to Install** – Much easier to install than a real fence
- **Moldable** – Can easily be shaped to your liking
- **Versatile** – Can be used in many applications / projects
- **Durable & Long Lasting** – Resistant to rust, weather
- **Invisible** – Blends with the background

Description

- **Galvanized welded wire hardware cloth specifications:**
- Product name: **1/2"x1/2" 19 gauge galvanized welded wire hardware cloth**
- Mesh size or openings: **1/2 inch x 1/2 inch**
- Wire Gauge: **19 GA (19 Gauge)**
- Color: **Silver**
- Finish: **Galvanized steel**
- Process: **Galvanized Before Welding (GBW)**
- Packaging: **16 rolls per pallet / 66 pounds per roll**
